What is Cisco Networking Academy?

Cisco Academy is an IT skills and career-building program for schools and individuals.

More than 6 million people have joined the Academy since it began in 1997.

Networking Academy delivers online teaching, interactive tools, and hand-on learning to students.

Our partnership with Metropolitan Community College's Business and Technology Center, lets us offer some of our courses for dual-credit.

At SJCS, we teach these courses from a biblical perspective.

How do I get started?

1) Download a Cisco Academy enrollment packet from the website. Make an appointment with Mr. Konyha to ensure you are eligible for dual-credit enrollment, and have an available College Online or Study Hall hour. He will sign your form.

2) Log on to www.mcckc.edu/apply and complete their online application to obtain your student ID#

3) Return your enrollment packet to the school office. They will put it in Mr. Miller's mailbox. Or email to

millert@stjosephchristian.com.
